mobile era
OSLO 2016

Mobile Era is organized by a team of enthusiasts across several technology companies in Oslo. We're passionate about developing mobile apps and want to see a kick-ass event in Oslo for people like ourselves. The organizing committee consists of developers who are also active in organizing open events, conferences and meetups in the Oslo developer community.

Although we do this mostly in our spare time and for the fun of it, the conference would not have been possible without our generous sponsors.

The conference organization is a non-profit legal organization registered as MOBILE ERA CONFERENCE with organization number 917 217 025. Any profit from the conference will be used for next years event.
